

# HERRIARD VILLAGE CENTRE

## Herriard Village Centre update May 2009

The developers are working slightly ahead of schedule at the moment, thanks partly to the good weather. The ground workers will continue the landscaping of the sports pitches and public open space over the next 5-6 weeks and it is expected that the pavilion foundations will be ready to be poured in June.

As you can see from this photograph, the HVC Committee has been busy working with the developers over the past month to ensure that the sports pitches will be fit for purpose. A large part of this exercise has focused on an improved drainage solution and one of the results of this is that there will be a wetland conservation area on the southwest boundary that will enhance the amenity value of the HVC and provide a valuable educational facility.

For health and safety reasons the site will be secured as much as possible but we must respectfully remind all parishioners not to venture on site without prior permission.
